Kyle, TX 78640

- INSTRUCTIONS:** 1. Decide on a theme, ie. Herb garden, summer garden, shade garden. Choose plants that have the same light and water requirements. Keep in mind where the topiary will be placed when finished. Include upright and trailing plants for variety. Your nursery person can help you with this.
2. Construct it on the LEVEL site where it will sit as it will be too heavy to move.
3. Place the Incredible Plant Stand into the bottom of the 12" pot. Fill pot ½ to ¾ full of rocks to add weight and maintain drainage, then, fill the rest of the pot with soil.
4. With the round disc up, slide one of the Topiary Spacers down over the stem of the plant stand all the way to the bottom of the stem and rest it on the top of the wings which are in the base pot.
5. Fill the 8" pots with soil. Slide one of the pots onto the Plant Stand through the drain hole and rest the base of the pot on top of the disc.
6. Slide the second Topiary Spacer onto the Plant Stand in the same manner as the first, resting the bottom of the Spacer on the bottom of the 8" pot.
7. Add the second 8" pot as in #5. Plant plants and add a a finial if you like!
